ABOUT ME

Eron Bruti

I am 21-year-old software and electronics hobbyist from Kaçanik, Kosovo with interests in deep learning based image analysis . I started my digital journey many years ago from my love to learn about how things work, I focused on computer sciences and learned through the year a decent technical experience in software development, web design and database management.
I am not just a code monkey, I create solutions that matter. Be it a state of the art website, heavy-duty application or data file system optimization; I address all these projects with creativity, accuracy and perfection. I have a passion of learning and adapting fast enough to this rapidly evolving field.
Beyond code I am a natural problem-solver, exploring creative solutions for puzzles. I love to work on a team filled with creative ideas and environments, I am excited to join in providing valuable input as is possible by them being the most likely surrounding for what i have to offer.

VOLUNTEERING

14/08/2021 – 12/09/2023 Kacanik

Volunteer, IT and Technology Sector

Website Development for Nonprofits: Designed and maintained websites for local nonprofit organizations, ensuring they have a strong online presence to reach their audiences effectively.
Tech Support for Community Centers: Provided technical support and troubleshooting for community centers, helping them maintain their computer systems, networks, and software.
Coding Workshops for Youth: Led coding workshops for young students, teaching them basic programming skills and inspiring interest in technology.
IT Support for Charity Events: Offered IT support during charity events, setting up and managing AV equipment, live streaming, and other tech-related tasks to ensure smooth operations.
Digital Literacy Training for Seniors: Conducted digital literacy sessions for seniors, helping them learn how to use computers, smartphones, and the internet safely and efficiently.
Open Source Contributions: Contributed to open-source projects, improving software and tools that benefit the global community, while collaborating with developers worldwide.
Tech Consulting for Small Businesses: Provided free tech consulting services to small businesses, advising them on how to improve their IT infrastructure and adopt new technologies.
Cybersecurity Awareness Workshops: Organized and led cybersecurity awareness workshops, educating participants on best practices for online safety and protecting their digital information.
App Development for Social Causes: Developed a mobile app to support a social cause, such as connecting volunteers with local opportunities or raising awareness for environmental issues.
IT Equipment Donation and Setup: Collected, refurbished, and donated computers and other tech equipment to schools or underserved communities, ensuring they have access to the tools they need.
